This chart illustrates the top ten training providers based on WIOA enrollment numbers during 2017-2019.

ETPL Recommendations and Proposed Timeline

1. Notify current ETPL training providers in writing that credential attainment is expected for all WIOA enrollments to align with federal WIOA performance expectations, emphasizing the training provider responsibility for credential attainment. This recommendation is a direct result of poor WIOA performance in credential attainment. Providers who do not show significant improvement in this performance measure will be removed from the ETPL. Provide ongoing guidance to providers related to updated state definitions of recognized credentials. Share credential attainment performance data with each provider by specific programs. The credential attainment rate performance goal is 70%.
2. Establish a process for new provider and new program review and evaluation that aligns with NM Workforce Board meetings. This process is recommended in order to coordinate ETPL decisions with Board meeting dates, and to eliminate or reduce the need for called meetings.
3. Deactivate 64 training providers who have not served a WIOA participant in the last two program years.
4. Deactivate 607 individual programs which have not served a WIOA participant in the last two program years.
5. Deactivate programs which do not provide a credential.
